

Xm Radio provides a valueable service that is not avalible from local broadcasters and I would urge you to reject the NAB's petition 04-160. I work thru out the US and Canada and find that XM helps me plan my route's and gives me up to date information in a timely manner. Haveing this information readily avalible is a great stress reliver and helps me avoid weather and traffic tie ups and provides one extra safty and support system. It also allows me to keep more informed than ever before. Let the free market decide were it wants to go.Thanks
